

Sprint 1 Report: Synthura April 23, 2024

- Actions to stop doing
 - We will stop meeting 3 times a week after class and switch to only meeting Mondays after class and on Wednesdays with Michelle. This is because meeting 3 times a week is becoming a steep time commitment, and much of this work can be done individually.
- Actions to start doing
 - We will start checking in more with each other to verify progress. We will continue to work between our teams more. Since the initial frontend is essentially complete, we are now focusing on connecting the cameras.
- Actions to keep doing
 - Our team will continue meeting weekly after class on Mondays and meeting with Michelle on Wednesdays. We will continue communicating on discord. We will continue to work in teams, backend and frontend, with some members dedicated to the connections between both. We will continue to log our hours in a discord channel so that other members know what each other member is doing. We will continue to have the Scrum master for each sprint handle the sprint plan and report.
- Work completed/not completed
 - 2 out of 3 user stories have been completed. The completed stories are
 - I want a website where I can login via google, connect my camera, and have detailed object labeling and tracking. [4]
 - I want an info feed where I can see present items and detect motion. [2]
 -
 - The incomplete story is
 - I want to be able to connect multiple cameras for my easily accessible security cluster, using the feature of add / delete camera, and then connect / disconnect camera. [5]
 - This story is incomplete because we were not able to add cameras yet.
- Work completion rate
 - We worked an average of 40 hours per week as a team.
 - The total work days for Sprint 1 was 16
 - The minimum work hours per week per individual is 6 hours. This can be broken into days as they see fit. Many members went over this and worked an average of 9 hours per week.
 - For every day of Sprint 1, 2/16th of a user story was completed.
